Introduction to Healthcare AI Assistant website

The platform is built to manage a complete clinic ecosystem.

From a business perspective, the goal of the system is to:

Improve the patient experience

Reduce operational costs for clinics

Organize medical data and appointments

Increase the efficiency of doctors and staff

Support management with accurate reports and analytics

This system is meant to handle large amounts of data and serve multiple roles (patients, doctors, reception, admins), so quality, reliability, and performance are critical for business success.

Manual Testing

- Before the data comes the diligence. Manual testing is where our team's critical thinking and user empathy ensure the product not only functions, but feels right. These screenshots capture the evidence of that essential human verification.

Contact Page

Test Case ID	Pre condition	Test Scenario	Title	Test Steps	Test Data	Test Objective (Description)	Expected Result	Actual Result (V1)	Retest in V2	Pass/Fail
ContP01	Click on the button contact us on home page	Verify first and last name	Valid first and last name	1.on home page 2. click on button coontact us 3. type name	First and last name : Characters and spaces	Valid First and last name must contains characters and spaces	System accepts the First and last name field and no error message will be displayed	System accepted the User name field and no error message will be displaved		pass
ContP02	Click on the button contact us on home page	Verify first and last name	Invalid first and last name	1.on home page 2. click on button coontact us 3. type name	Firrst and last name : Special characters First and last name : First character space First and last name :	Invalid First and last name that contains numbers, special characters or first charater space is	System displays error message indicating "Entered data is not allowed"	Error massege : Name must contain letters only		pass
ContP03	Click on the button contact us on home page	Verify first and last name	Blank first and last name	1.on home page 2. click on button coontact us 3. type name	First and last name : Blank	First and last name cannot be blank	System displays error message indicating " First and last name is required"	Error: Name is required		pass

ContP05	Click on the button contact us on home page	Verify Email	Invalid email	1.on home page 2. click on button coontact us 3. type email	email: aba123gmail.com email: aba 123@gmail.com email: aba123@gmail email: aba12@mail.com	Invalid email that not contains @ is not allowed Invalid email that contains space is not	System displays error message indicating "Entered data is not allowed"	Error massege for all one of this situation clear the wrong data		pass
ContP06	Click on the button contact us on home page	Verify Email	blank email	1.on home page 2. click on button coontact us 3. type email	email:blank	User name cannot be blank	System accepts the user name field and no error message will be displayed	Error message: Enter a valid email		pass

Add Doctor

Clinic User Account (Add Doctor)									
Test Case ID	Pre-Condition	Test Scenario	Test Steps	Test Data	Test Objective	Expected Result	Actual Result (V1)	Retest in V2	Pass/Fail
CUA-1	Clinic Admin have account and logged in the website	Verify Valid Name	1-Open website https://wandepl.github.io/mega/ 2-Login with a valid email and matching password 3- Click on "Dashboard" 4-Click on "Add Doctor" 5-Enter Characters and spaces in "FullName" field	Full Name : Kholoud ELamin	Valid Full Name must contains characters and spaces	System accepts full name field and no error message will be displayed	System accepts full name field and no error message will be displayed		pass
CUA-2			1-Open website https://wandepl.github.io/mega/ 2-Login with a valid email and matching password 3- Click on "Dashboard" 4-Click on "Add Doctor" 5-Leave "Full Name" blank 6-Click on "Add Doctor"	Full Name :	Full Name cannot be blank	System displays error message indicating " Name is required"	System displays error message indicating " Name is required"		pass
CUA-3			1-Open website https://wandepl.github.io/mega/ 2-Login with a valid email and matching password 3- Click on "Dashboard" 4-Click on "Add Doctor" 5- Enter not valid name in "FullName" field	Full Name : Kholoud ELamin Full Name : KholoudELamin123	Not Valid Name contains Special characters, Numbers and First Character cannot be space	System displays error message indicating " Name is not valid"	Error: Unauthorized - Invalid or missing token		pass
CUA-4		Verify Email	1-Open website https://wandepl.github.io/mega/ 2-Login with a valid email and matching password 3- Click on "Dashboard" 4-Click on "Add Doctor" 5- Enter valid email in "Email" field	Email : KholoudMohamed22@gmail.com	Valid Email must be end with @, domain name, top level domain and can contains characters, numbers, dot character and underscore character	System accepts the email and no error message will be displayed	Error: Unauthorized - Invalid or missing token		pass
CUA-5			1-Open website https://wandepl.github.io/mega/ 2-Login with a valid email and matching password 3- Click on "Dashboard" 4-Click on "Add Doctor" 5- Enter Not valid email in "Email" field	Email : Kholoud@Mohamed22@gmail.com Email : Kholoud@gmail.com Email : KholoudMohamed22@gmail.com Email : Kholoud@Mohamed22@gmail.com Email : KholoudMohamed22@gmail.com	Not Valid Email contains spaces, and be without @symbol without domain name, without top level domain, without special characters, invalid domain name, invalid top level domain, multiple consecutive dots, multiple @ symbols, not without	System display error message indicating " email is invalid"	Error: Unauthorized - Invalid or missing token		pass
CUA-6			1-Open website https://wandepl.github.io/mega/ 2-Login with a valid email and matching password 3- Click on "Dashboard" 4-Click on "Add Doctor" 5- leave the "Email" field empty	Email :	email field can't be blank	System display error message indicating " email is required"	System display error message indicating " email is required"		pass
CUA-7		Verify Photo (Mock Only)	1-Open website https://wandepl.github.io/mega/ 2-Login with a valid email and matching password 3- Click on "Dashboard" 4-Click on "Add Doctor" 5- Upload photo in "Photo (Mock Only)" field	Photo (Mock Only): upload mock photo	Preview functionality	The image is accepted and a preview is shown, just as if it was uploaded via the file browser.	Photo uploaded Successfully		pass
CUA-8			1-Open website https://wandepl.github.io/mega/ 2-Login with a valid email and matching password 3- Click on "Dashboard" 4-Click on "Add Doctor" 5- Leave the "Photo (Mock Only)" field empty	Photo (Mock Only):	Preview functionality	Submission is prevented. An error message appears: "Photo (Mock Only) is required."	Error: Please upload a profile photo		pass
CUA-9		Verify Password	1-Open website https://wandepl.github.io/mega/ 2-Login with a valid email and matching password 3- Click on "Dashboard" 4-Click on "Add Doctor" 5- Enter valid password in "Password" field is empty	Password: 0,mKr3#dWlg2	Valid password contains Characters,Special characters,spaces anywhere,and Numbers	System accepts Password field and no error message will be displayed	System accepted Password field and no error message will be displayed		pass
CUA-10			1-Open website https://wandepl.github.io/mega/ 2-Login with a valid email and matching password 3- Click on "Dashboard" 4-Click on "Add Doctor" 5- Leave the "password" field is empty	Password:	Password field cannot be blank	System displays error message indicating " Password is required"	Error:Password is required		pass
CUA-11			1-Open website https://wandepl.github.io/mega/ 2-Login with a valid email and matching password 3- Click on "Dashboard" 4-Click on "Add Doctor" 5- Enter invalid password in "password" field	Password :12345 Password :spaces only	Invalid password is under 8 digits or characters and if it is all spaces	System displays error message indicating " Password is invalid"	Error messages : 1-Error: undefined > when enter spaces only 2- Password must be at least 8 characters>when enter less than 8		pass
CUA-12		Verify Confirm Password	1-Open website https://wandepl.github.io/mega/ 2-Login with a valid email and matching password 3- Click on "Dashboard" 4-Click on "Add Doctor" 5- Enter valid password in "Password" field is empty 6- enter the same password in "confirm password" field is empty	Password: 0,mKr3#dWlg2 confirm password:0,mKr3#dWlg2	confirm password must be same the password	System accept Password field and no error message will be displayed	System accept Password field and no error message will be displayed		pass
CUA-13			1-Open website https://wandepl.github.io/mega/ 2-Login with a valid email and matching password 3- Click on "Dashboard" 4-Click on "Add Doctor" 5- Enter valid password in "Password" field is empty 6- enter the same password in "confirm password" field is empty	Password: 0,mKr3#dWlg2 confirm password:0,mKr3#dWlg	confirm password must matching	System displays error message indicating "Passwords do not match." -	System displays error message indicating "Passwords do not match." -		pass
CUA-14		Verify UserType	1-Open website https://wandepl.github.io/mega/ 2-Login with a valid email and matching password 3- Click on "Dashboard" 4-Click on "Add Doctor" 5- Select Doctor in "User Type" field	User Type :Doctor	User Type must be selected	System accepts User Type field and no error message will be displayed	System accepted User Type field and no error message will be displayed		pass
CUA-15			1-Open website https://wandepl.github.io/mega/ 2-Login with a valid email and matching password 3- Click on "Dashboard" 4-Click on "Add Doctor" 5- Select Reception in "User Type" field	User Type : Reception	User Type must be selected	System accepts User Type field and no error message will be displayed	System accepted User Type field and no error message will be displayed		pass
CUA-16			1-Open website https://wandepl.github.io/mega/ 2-Login with a valid email and matching password 3- Click on "Dashboard" 4-Click on "Add Doctor" 5- Select "Select a type" in "User Type" field	User Type : Select a type	User Type must not be not selected(Blank)	System displays error message indicating "Please select a user type"	Error: Please select a user type		pass
CUA-17		Verify Create Clinic User Account	1-Open website https://wandepl.github.io/mega/ 2-Login with a valid email and matching password 3- Click on "Dashboard" 4-Click on "Add Doctor" 5- Enter valid email 6- Enter valid password 7- Confirm password 8- Select Doctor in "User Type" field	Full Name :KholoudMohamed Email :kholoudmohamed22@gmail.com Photo :Upload photo Password:0,mKr3#dWlg2 Confirm password:0,mKr3#dWlg2 User Type :Doctor	Regist with all Valid fields (name, email,password,and user type)	System will add new Clinic User Account successfully	Clinic user registered successfully		pass
CUA-18			1-Open website https://wandepl.github.io/mega/ 2-Login with a valid email and matching password 3- Click on "Dashboard" 4-Click on "Add Doctor" 5- Enter valid email 6- Enter valid password 7- Confirm password 8- Select Doctor in "User Type" field	Full Name :KholoudMohamed Email :kholoudmohamed22@gmail.com Photo :Upload photo Password:0,mKr3#dWlg2 Confirm password:0,mKr3#dWlg2 User Type :Reception	Clinic user cannot be added with Exist email	System displays error message indicating " email is already exist" and no clinic user will be added	Error: This email is already registered.		pass

Bug Report

1-New User

Defect #	Status	Raised By	Tested on Version	Test Case ID	Steps to Reproduce	Expected Result	Actual Result	Priority	Severity
1	Closed	Nourhan Mohamed	2.0	NU_2	1- Open Website 2-Click Register button 3-Enter User name : Special characters User name : First character space, special characters or numbers in user name field 4-Click Register button	System displays error message indicating "Entered data is not allowed"	System accepted the User name field and no error message will be displayed	High	Low
2	Closed	Nourhan Mohamed	2.0	NU_5	1- Open Website 2-Click Register button 3- Enter the email (without @ symbol) Enter the email (with a space in it) Enter the email (without ".com" at the end) Enter the email (missing a character or number)	System displays error message indicating "Entered data is not allowed"	Accept email with invalid domain name	High	High
3	Closed	Nourhan Mohamed	2.0	NU_8	1- Open Website 2-Click Register button 3-Enter 7 digits in password field 4- Enter all the password spaces	System displays error message indicating "password must be 8 digits or more" or the password is invalid	system accepted password which all characters are spaces	medium	low
4	Closed	Nourhan Mohamed	2.0	NU_14	1- Open Website 2-Click Register button 3-fill the fields 4-Enter Invalid phone number in Number field 5- Click Register	System displays error message indicating "phone number is not valid"	system accepted invalid phone number	High	medium
5	Closed	Nourhan Mohamed	2.0	NU_16	1- Open Website 2-Click Register button 3-fill all the fields with valid datd 5- Click Register	System will add new user successfully	No massege appears and new user is not added	High	High
6	Closed	Nourhan Mohamed	2.0	NU_17	Name : Mohamed Email : nour123@gmail.com Phone number :01111612157 Password :dfg125 Confirm password :dfg125	A new user can not be added with exist email	System displays error message indicating " email is already exist" and no user will be added	High	low
7	Open	Nourhan Mohamed	2.0	NU_18	Name : Ahmed Email : nour111@gmail.com Phone number :01010612157 Password :dfg126 Confirm password :dfg126	A new user can not be added with exist phone number	System displays error message indicating " phone number is already exist" and no user will be added	High	low

Bug Report

2-Change Password

Change Password Page

Ad_pass1		Password update succesful	Valid Password Change	1. Enter valid current 2. new 3. confirm 4. Click Update Passwor	Current: Admin@123 New:Test@456 Confirm: Test@456	Verify successful update	Success message	Password updated successfully		Pass
Ad_pass2	User logged in	Wrong current password	Invalid Current Password	1. Enter wrong current password 2. new 3. confirm	Current: Wrong@123 New:Test@456 Confirm: Test@456	Ensure validation	Error: "Incorrect current password"	Error displayed: "Incorrect password."		Pass
Ad_pass3	User logged in	Mismatched new passwords	New & Confirm mismatch	1. Enter wrong current password 2. new 3. Enter different confirm passwords 4. Click Update Passwor	Current: Admin@123 New:Test@456 Confirm: Test@450	Prevent invalid update	Error: "Passwords do not match"	Error displayed: "Passwords do not match."		Pass
Ad_pass4	User logged in	Missing Inputs	Blank Inputs	Click Update Password without entering fields		Check validation	Required fields message under each input	System displayed validation errors for required fields.		Pass
Ad_pass5	User logged in	Weak Password	Weak Format	Enter weak new password "12345678"	Current: Admin@123 New:12345678 Confirm: 12345678	Enforce password policy	Error: Must contain letters, numbers & symbols	System accepted weak password without validation.		Fail
Ad_pass6	User logged in	Same Password re-use	New same as current	New password = current password	Current: Admin@123 New:Admin@123 Confirm: Admin@123	Prevent reuse	Error: "New password must be different"	System displayed error message "New password must be different."		Pass
Ad_pass7	User logged in	Length validation	Min Password Length	Enter 3-character password	Current: Admin@123 New:ab1 Confirm: ab1	Ensure min length rule	Show error: Min 6 characters	System displayed message error "Password must be at least 6 characters."		Pass
Ad_pass8	1. Admin logged in 2. and in Change Password Page	Cancel button	Cancel Operation	Click Cancel		Ensure navigation behavior	Return to Home Page	Cancel button does nothing — user stays on the Change Password form (no navigation,		Fail
Ad_pass9	1. Admin logged in 2. and in Change Password Page 3. Admin Typing	Toggle visibility	Eye Icon Toggle	Click eye icon in each field		Ensure password visibility	Toggle from *** to text	Eye icon toggled password visibility properly.		Pass

Automation: Scaling Our Quality Safeguards

- To complement our exploratory manual testing, we employ **strategic test automation**. It serves as our force multiplier—handling repetitive checks with speed and precision. This allows us to:
- Protect existing functionality through reliable regression suites.
- Validate builds instantly with automated smoke tests.
- Execute data-driven tests at a scale impossible to do manually.
- Automation is the engine that gives us **repeatability, speed, and data**, ensuring we can deliver quality consistently at pace.

Automated Login Testing: Architecture & Implementation

Objective: To validate the core login functionality with speed, accuracy, and data-driven precision, ensuring a secure and reliable user entry point.

AUTOMATION TESTING

Login_Tests.java

16 @BeforeTest

17 public void OpenBrowser() {

18 driver = new ChromeDriver();

19 driver.manage().window().maximize();

Automated Title Validation Testing Framework

Title Validation Testing ensures that web pages display correct, dynamic, and contextually appropriate titles across the entire application. Our automated framework validates:

- Page title accuracy per business requirements
- Dynamic title updates (based on user actions/content)
- SEO compliance and formatting standards
- Multi-language title rendering
- Browsertab/window title consistency

AUTOMATION TESTING

The screenshot displays an IDE with two tabs: `search_adminclinc.java` and `*Test_title.java`. The `*Test_title.java` tab is active, showing the following Java code:

```
7 import org.testng.Assert;
8 import org.testng.annotations.AfterTest;
Run ALL
9 public class Test_title {
10     String URL = "https://teamdepi.github.io/mega/";
11     WebDriver driver = new ChromeDriver();
12
13     @BeforeTest
14     public void OpenBrowser() {
15
16         driver.navigate().to(URL);
17         driver.manage().window().maximize();
18     }
19     @Test
Run | Debug
20     public void beforeTest() throws InterruptedException {
21         String expectedResult = "Insove - Your Healthcare Partner";
22         String actualResult = driver.getTitle();
23         Assert.assertEquals(expectedResult, actualResult);
24         Thread.sleep(3000);
25     }
26 }
27
28 @AfterTest
29     public void afterTest() {
30
31         driver.close();
32     }
```

Below the code editor, the **Results of running class Test_title** window is open. It shows a summary of test results:

- Search:
- Passed: 1
- Failed: 0
- Skipped: 0
- Tests: 1/1 Methods: 1 (13485 ms)

The **All Tests** tab is selected, showing a tree view with **Default suite (1/0/0/0) (3.058 s)**. The **Failure Exception** tab is also visible.

The **Console** window shows the following output:

```
<terminated> Test_title [TestNG] C:\Users\mario\.p2\pool\plugins\org.eclipse.justj.openjdk.hotspot.jre.full.win32.x86_64_21.0.7.v20250502-0916\jre\bin\javaw.exe
=====
Default suite
Total tests run: 1, Passes: 1, Failures: 0, Skips: 0
```

API Testing: The Backbone of Digital Reliability

- API Testing is the critical discipline of validating these hidden engines of functionality. It's where we ensure that:
- Services communicate flawlessly—sending the right data, to the right place, at the right time
- Business rules are enforced at the system's core, not just the surface
- Performance and security are baked into the foundational architecture
- Third-party integrations work reliably, extending our capabilities

API Testing: The Registration Engine

1. Test Case Design & Documentation

	Test Case ID	Module	API Name	Method	Endpoint	Pre-condition	Test Scenario	Request Body/Header/Params	Expected Status Code	Expected Result	Actual Result	Status
1	AUTH-01	Auth	Register	POST	/api/Auth/register	User not registered	Valid registration	body-->All required fields valid	201	User registered successfully	201 Created A new resource was	Pass
2	AUTH-02	Auth	Register	POST	/api/Auth/register	Email already exists	Email already exists	body-->Existing email	409	Email already registered error	409 Conflict The request conflicts	Pass
3	AUTH-03	Auth	Register	POST	/api/Auth/register	Missing required field	Invalid model state	body-->Missing email / password	400	Validation error returned	400 Bad Request The server could not	Pass
4	AUTH-04	Auth	Register	POST	/api/Auth/register	Invalid email format	Invalid email format	body-->invalid email	400	Invalid email validation message	400 Bad Request The server could not	Pass
5	AUTH-05	Auth	Register	POST	/api/Auth/register	Weak password	Password policy violation	body-->Weak password	400	Password validation error	201 Created A new resource was	Fail
6	AUTH-06	Auth	Register	POST	/api/Auth/register	Special characters	Invalid characters	body-->Special chars in fields	400	Validation error	400 Bad Request The server could not	Pass

API Testing: The Registration Engine

1. Request & Response Validation in Postman

The screenshot displays the Postman application interface. On the left sidebar, the 'Collections' panel is expanded, showing a hierarchy: 'Health Care' > 'api' > 'Auth' > 'register' > 'POST Register a new user account...'. The main workspace shows the details of this selected request. The request is a POST to 'Health Care / api / Auth / register' with the URL 'Register a new user account'. The body is raw JSON:

```
{  "email": "esraa21@gmail.com",  "fullname": "esraa mohamed",  "password": "stringstring1",  "phonenumber": "01068791528"}
```

. The response tab at the bottom shows a 201 status code with the message 'Account created successfully. Please check your email to verify your account.' and other details like 'requiresverification: true' and 'timestamp: 2025-12-16T16:27:06.942657Z'.

Postman Interface showing a POST request to register a new user account. The request body is JSON:

```
1 {
2   "email": "esraa21@gmail.com",
3   "fullname": "esraa mohamed",
4   "password": "stringstring1",
5   "phonenumber": "01068791528"
6 }
```

The response is a 201 Created status, indicating successful registration. The response body is JSON:

```
1 {
2   "statusCode": 201,
3   "message": "Account created successfully. Please check your email to verify your account.",
4   "traceId": "000050da-0004-c000-b63f-84710c7967bb",
5   "requiresverification": true,
6   "otpexpiresat": "2025-12-16T16:32:05.16000892Z",
7   "remainingresends": 5,
8   "success": true,
9   "timestamp": "2025-12-16T16:27:06.942657Z"
10 }
```

Postman interface showing a workspace named "Esraa Mohamed's Workspace". The left sidebar displays a collection tree under "Health Care" > "api" > "Clinic" > "create-clinicrequest". The main editor shows a POST request to `{{baseUrl}}/api/Clinic/create-clinicrequest` with a body of JSON data:

```
{
  "email": "clinc@gmail.com",
  "medicalspecialtyid": "7ccd0e1a-3b28-4e59-b7fe-26187393940b",
  "name": "clinic",
  "addresscountry": "string",
  "addressgovernrate": "string",
  "addresscity": "string",
  "addresslocation": "string",
  "phone": "01061972901"
}
```

The response is displayed below the request, showing a 200 OK status with a response time of 576 ms and a body of JSON data:

```
{
  "statusCode": 200,
  "message": "We have received your request, and it is currently under review. An email will be sent after the review.",
  "traceId": "80003315-000a-fd00-b63f-84710c7967bb"
}
```

The bottom status bar includes options like "Cloud View", "Find and replace", "Console", "Terminal", "Runner", "Start Proxy", "Cookies", "Vault", "Trash", and "Beta".
